CONTENTS

Nos. 1 and 2. JANUARY 1945

PAGE

MICHAEL BEGG AND JAMES H. SANG. The time of action of the gene *Antennaless* and its effect on the development of the cephalic complex of *Drosophila melanogaster*. (With Four Text-figures) 1

C. G. BUTLER. The influence of various physical and biological factors of the environment of honeybee activity. An examination of the relationship between activity and nectar concentration and abundance. (With Five Text-figures) 5

J. D. SMYTH, W. J. BINGLEY AND G. R. HILL. The distribution of vitamin C in *Nyctotherus cordiformis* Ehrenberg, *Opisthioglype ranae* Frölich, and *Toxocara canis* Werner. (With Five Text-figures) 13

D. S. FALCONER. On the behaviour of wireworms of the genus *Agriotes* Esch. (Coleoptera, Elateridae) in relation to temperature. (With Thirteen Text-figures) 17

D. S. FALCONER. On the movement of wireworms of the genus *Agriotes* Esch. (Coleoptera, Elateridae) on the surface of the soil and their sensitivity to light. (With Four Text-figures) 33

C. ELLENBY. Oxygen consumption of prepupae of *Drosophila melanogaster* Meigen, in relation to the surface area of the puparium. (With Four Text-figures) 39

N. AMBACHE, A. ST J. DIXON AND E. A. WRIGHT. Some observations on the physiology and pharmacology of the nerve endings in the crop and gizzard of the earthworm, with special reference to the effects of cooling. (With Ten Text-figures) 46

H. W. LISSMANN. The mechanism of locomotion in gastropod molluscs. I. Kinematics. (With Plate 1 and Eleven Text-figures) 58

JOSEPH BARCROFT AND I. MAUREEN YOUNG. Internal oxygen environment of the brains of post-mature rabbit embryos. (With Three Text-figures) 70

Nos. 3 and 4. AUGUST 1945

ERIC PONDER. The sickling phenomenon and its bearing on the problem of red cell structure. (With One Text-figure) 77

B. DE MEILLON, L. GOLBERG AND M. LAVOIPIERRE. The nutrition of the larva of *Aedes aegypti* L. I. 84

L. GOLBERG, B. DE MEILLON AND M. LAVOIPIERRE. The nutrition of the larva of *Aedes aegypti* L. II. Essential water-soluble factors from yeast 90

V. B. WIGGLESWORTH. Transpiration through the cuticle of insects. (With Plates 1 and 2 and Six Text-figures) 97

J. W. L. BEAMENT. The cuticular lipoids of insects. (With Seven Text-figures) 115

D. L. GUNN AND R. H. KNIGHT. The biology and behaviour of *Ptinus tectus* Boie. (Coleoptera, Ptinidae), a pest of stored products. VI. Culture conditions. (With Eight Text-figures) . 132

A. E. NEEDHAM. Peripheral nerve and regeneration in crustacea 144

T. YAO. Studies on the organizer problem in *Pelmatohydra oligactis*. I. The induction potency of the implants and the nature of the induced hydranth. (With Three Text-figures) . . 147

T. YAO. Studies on the organizer problem in *Pelmatohydra oligactis*. II. The effect of some respiratory inhibitors and stimulants and of oxygen deficiency on the induction potency of the hypostome 151

H. P. LI AND T. YAO. Studies on the organizer problem in *Pelmatohydra oligactis*. III. Bud induction by developing hypostome. (With Two Text-figures) 155

H. MUNRO FOX. The oxygen affinities of certain invertebrate haemoglobins. (With Two Text-figures) 161

Index 166
